

## **Dublin City University School of Computing**

# APPLICATION FOR APPROVAL OF AN UNDERGRADUATE OR TAUGHT MASTERS PROJECT INVOLVING HUMAN PARTICIPANTS

<u>Please read the following information carefully before completing and submitting your</u>
<u>application.</u> Applications must be submitted via the project dashboard

Student applicants must include their supervisor as the Principal Investigator (PI). The form should be checked, approved and signed in digital form by the supervisor in advance of submission.

The application should consist of <u>one electronic file only, in PDF format</u>, with an electronic signature from the PI (the project supervisor) and yourselves, the students. The completed application must incorporate all supplementary documentation, especially those being given to the proposed participants.

All sections of the application form must be answered as instructed and within the word limits given.

Applications must be completed on the form; answers in the form of attachments will not be accepted, except where indicated. No hardcopy applications will be accepted. The project <u>must not</u> commence until approval has been received from the School Research Ethics Committee.

PROJECT TITLE	INTENDI
PRINCIPAL INVESTIGATOR(S) The Principal Investigator is the project supervisor and s/he has primary responsibility for the project.	Michael Scriney
START AND END DATE	Start - 19th November 2020 End - 1st July 2021
STUDENT NAME(S), COURSE AND YEAR (E.G. EC4)	Karl Duignan - Computer Applications - CASE4 Luke Hebblethwaite - Computer Applications - CASE4
LEVEL OF RISK  Please confirm that this project requires  notification only	Notification only: YES / NO

Version modified from DCU REC for use by School of Computing, September 2020 Page 1

## 1. ADMINISTRATIVE DETAILS

1.1 WILL THE PROJECT BE UNDERTAKEN ON-SITE AT DUBLIN CITY UNIVERSITY?

Due to	working	from hom	e requiremer	nts for the	COVID-19	pandemic

## **DECLARATION BY PRINCIPAL INVESTIGATOR / SUPERVISOR**

The information contained herein is, to the best of my knowledge and belief, accurate. I have read the University's current research ethics guidelines, and accept responsibility for the conduct of the procedures set out in the attached application in accordance with the form guidelines, the REC guidelines (https://www.dcu.ie/researchsupport/researchethics.shtml), the University's policy on Conflict of Interest, Code of Good Research Practice and any other condition laid down by the Dublin City University Research Ethics Committee. I have attempted to identify all risks related to the project that may arise in conducting this project and acknowledge my obligations and the rights of the participants.

If there exists any affiliation or financial interest for researcher(s) in this project or its outcomes or any other circumstances which might represent a perceived, potential or actual conflict of interest this should be declared in accordance with Dublin City University policy on Conflicts of Interest.

I and my co-investigators and/or supporting staff have the appropriate qualifications, experience and facilities to conduct the project set out in the attached application and to deal with any emergencies and contingencies related to the project that may arise. Supervisor(s) signature(s) are required as evidence that they have read and approve the submission.

#### Please note:

- 1. Any amendments to the original approved proposal must receive prior School Ethics Committee approval.
- 2. As a condition of approval investigators are required to document and report immediately to the School of Computing Ethics Committee any adverse events, any issues which might negatively impact on the conduct of the project and/or any complaint from a participant relating to their participation in the study

## 2. PROJECT OUTLINE

2.1 LAY DESCRIPTION, AIMS & JUSTIFICATION, METHODOLOGY (up to .100 words) Please outline, in terms that any non-expert would understand, what your project is about, including what participants will be required to do. Please explain any technical terms or discipline-specific phrases. State the aims and significance of the project.

The project will be us building an online application which will have some pre-recorded lecture videos. The user/participant will then be able to watch these videos and while they do, their webcam, once permission is accepted, will record them watching the lecture video. This will then be used to analyse data such as concentration, emotion and other indicators that could suggest/help a lecturer understand and get feedback in regards to their lecture. All the video of the participants themselves will be deleted once the data process is complete. The user will be given access to the application to run in their own time. They will also be asked to fill out a form, with complete anonymity, about their feedback on the application.

#### 2.2 PARTICIPANT PROFILE

List and very briefly describe each participant group where applicable. For instance, participant group 1 will consist of..., participant group 2 will consist of... etc. Provide the number, age range and source of participants. Please provide a justification of your proposed sample size.

We will have 1 group. It will be a group of 5 fellow Computer Application students within our year group. The age range will range anywhere from over 18 years old. We will be just using 1 group to test our UI and also test our facial analysis software. We will source these participants from our friend group within our course.

### 2.3 PARTICIPANT RECRUITMENT

Please provide specific details as to how you will be recruiting participants. How will people be informed that you are doing this research? How will they be approached and asked if they are willing to participate? If you are mailing or phoning people, please explain how you have obtained their names and contact details. If a recruitment advertisement is to be used, please ensure you attach a copy to this application (Approx. 100 words).

We will post into our college year group chat on Discord asking if anyone was interested would they be willing to partake in the user testing of our web application. If they accept it we will message individually give them access to the application which they can run and test at their own time along with a link to the google form.

2.4I IS IT LIKELY THAT ANY PARTICIPANTS COULD BE CONSIDERED POTENTIALLY VULNERABLE? Are some or all participants vulnerable in any way? (e.g by virtue of the group they belong to, people who have undergone traumatic or adverse emotional events, people with diminished cognitive ability, power relations between students and participants etc.)?

YES	or	NO
NO		

If Yes, please state and describe what this vulnerability (or vulnerabilities) is and justify why this research is being done with such participants

2.5 WILL THE IDENTITY OF THE PARTICIPANTS BE PROTECTED?

YES or NO

## IF YOU ANSWERED YES TO 2.5, PLEASE ANSWER THE FOLLOWING QUESTION:

### 2.6 HOW WILL THE ANONYMITY OF THE PARTICIPANTS BE RESPECTED?

Please bear in mind that where the sample size is very small, it may be impossible to guarantee anonymity/confidentiality of participant identity. Participants involved in such projects need to be advised of this limitation in the Plain Language Statement/Information Sheet. If you intend to fully anonymize the data, please provide details

Each user will access the application from their own computer and without monitoring. They can then proceed with the testing. All uploaded data will have no indication of who it belongs to as it will be assigned a random generated unique ID. The google form will also not require any personal information and will be completely anonymous.

### 2.7 LEGAL LIMITATIONS TO DATA CONFIDENTIALITY

Participants need to be made aware that confidentiality of information provided cannot always be guaranteed by researchers and can only be protected within the limitations of the law - i.e., it is possible for data to be subject to subpoena, freedom of information claim or mandated reporting by some professions. This information should be included in your Plain Language Statement and Informed Consent Form. Depending on the project proposal and academic discipline, you may need to state additional specific limitations.

State how and where participants will be informed of these limitations

Users will be informed of these limitations in the Plain Language Statement and Informed Consent Form.

## 2.8(a) EXPLAIN HOW PARTICIPANTS ARE TO BE RECRUITED

Please provide specific details as to how you will be recruiting participants. How will people be informed that you are doing this research? How will they be approached and asked if they are willing to participate? If you are e-mailing, mailing or phoning people, please explain how you have obtained their names and contact details. If a recruitment advertisement is to be used, please ensure you attach a copy to this application.

We will post into our college year group chat on Discord asking if anyone was interested would they be willing to partake in the user testing of our web application. If they accept it we will individually give them access to the application which they can run and test at their own time along with a link to the google form.

### 2.8(b) CHILD PARTICIPANTS (anyone under 18 years old)

If your participants include children, you must confirm that you are in compliance with the research specific guidelines as detailed in "Keeping Children Safe - Policies and Procedures supporting Child Protection at DCU" - available at: https://www4.dcu.ie/sites/default/files/policy/157%20-%20child protection handbook rev1%282%29%281%29.pdf

Please indicate your compliance with the following guidelines:		
We confirm that we have read and agree to act in accordance with the DCU Child Protection policy and procedures		
We confirm that we have put in place safeguards for the children participating in the project	N/A	
We confirm that we have supports in place for children who may disclose current or historical abuse (whether or not this is the focus of the project)	N/A	

## WHETHER PARTICIPANTS WILL BE PROVIDED WITH ANY INFORMATION AS TO THE FINDINGS OR OUTCOMES OF THE PROJECT?

The results will be available to us on Google Forms after each participant completes the survey, the full set of results will be available in chart form once all participants have completed the survey. The results will be stored securely on Google Forms and participants can request results should they wish. Once the project has been graded all survey information will be deleted.

## 2.10 ARE OTHER APPROVALS REQUIRED TO GAIN ACCESS TO ANOTHER LOCATION, ORGANISATION, SCHOOL ETC.?

	SCHOOL ETC.?
Version mo	YES or NO No
	If YES, please specify from whom and attach a copy of the approval documentation. If this is not yet available, please explain when this will be obtained.
3. RISK	odified from DCU REC for use by School of Computing, September 2020 Page 5  AND RISK MANAGEMENT
	LAIN AND JUSTIFY THE STATED LEVEL OF RISK TO PARTICIPANTS  You must provide a justification that the stated level of risk and its corresponding level of review is notification only and not Full Committee or Expedited, as indicated on the cover page of your application. Note that the level of risk may be influenced by the vulnerability of the research group, the methods employed and the nature of the project itself. For further information on risk levels, please refer to the Levels of Review information on the website:  https://www.dcu.ie/researchsupport/researchethics.shtml
	The stated level of risk for our project is Notification. This is because there is minimal risk for the participants. We are using an anonymous survey and uploaded data. The analysis of data is in accordance with data protection legislation.
_	

3.2 POTENTIAL RISKS TO PARTICIPANTS AND RISK MANAGEMENT PROCEDURES Identify, as far as possible, all potential risks to participants (physical, psychological, social, legal, economic, etc.), associated with the proposed project. Will your project involve deception, investigation of participants involved in illegal activities, performance of any acts which might diminish the self-esteem of participants or cause them to experience embarrassment, regret or depression? Please explain what risk management procedures will be put in place to minimise these risks.

There should be no risk involved with this research.

3.3 ARE THERE LIKELY	TO BE ANY BENEFITS	6 (DIRECT OR INDIREC	CT) TO PARTICIPANT	S FROM THIS
RESEARCH?				

11000
YES or NO
No

If YES, provide details			

3.4 ARF THERE ANY	SPECIFIC RISKS TO YOURSELVES IN CARRYING OUT THIS PROJECT? Examples
include use of d	langerous materials, asking certain types of questions, The project being undertaken in certain locations, rking alone in isolated areas, etc.
YES or NO	king alone in Isolated areas, etc.
No	
If VEC. plages o	
IT YES, please o	describe and explain what risk management procedures will be put in place to minimise these risks
	DVERSE/UNEXPECTED OUTCOMES
	what measures/protocols you have put in place in the event that there are any unexpected outcomes or to participants arising from involvement in the project.
	of adverse or unexpected outcomes, we would report any incident to our supervisor
immediately	
<u> </u>	
3.6 SUPPORT FOR PA	
Consider wheth	risks to participants you may need to consider having additional support for participants during/after the study. ner your project would require additional support, e.g., external counselling available to participants. Please oport will be available.
We do not f	reel that our participants would require any additional support as there are no risks
	the research.
	REC for use by School of Computing, September 2020 Page 6 ONDUCT OF THE PROJECT BE MONITORED?
Please explain	how the principal investigator will monitor the conduct of the project (especially where several people are
	uiting or interviewing, administering procedures, etc.) to ensure that it conforms with the procedures set out in. In the case of student projects please give details of how the supervisor(s) will monitor the conduct of the
p <mark>roject.</mark>	THE base of statement projects produce give actions of the last experience (-)
	ct of the project will be monitored by the supervisor. He will ensure that it conforms with
the procedu	ures set out.
3.8 DO YOU PROPOS	E TO OFFER PAYMENTS OR INCENTIVES TO PARTICIPANTS?
YES or NO	
No	
If YES, please p	provide further details

3.9 DO ANY OF THE RESEARCHERS ON THIS PROJECT HAVE A PERSONAL, PHILOSOPHICAL, FINANCIAL, POLITICAL, IDEOLOGICAL, OR COMMERCIAL INTEREST IN ITS OUTCOME THAT MIGHT INFLUENCE THE INTEGRITY OF THE PROJECT OR BIAS THE CONDUCT OR REPORTING OF THE PROJECT, OR UNDULY DELAY OR OTHERWISE AFFECT THEIR PUBLICATION?

	If YES, please specify how this conflict of interest will be addressed
ı	

## 4. PERSONAL DATA - COMPLIANCE WITH THE GENERAL DATA PROTECTION REGULATION (GDPR) Applicant declaration:

0	I understand that the proposed project, as set out in this form, is to	YES or NO	YE	١
	be carried out by me in my capacity as a student of Dublin City		S	
	University.			١

### What does "Personal Data" mean?

Personal data is any information about a living person, where that person is identified or could be identified, either from the data itself or when it is combined with other data.

Personal Data is defined in Article 4(1) of the GDPR and can include, but is not limited to the following: hard-copy information (e.g. files, records); electronic information (e.g. databases, online survey returns); written information; consent declarations, interview notes, still or moving images; audio & visual recordings; IP addresses; an individual's handwriting; clinical or medical data; diagnostic or other clinical imaging; etc.

Further information is available from the **DCU Data Protection Unit** 

### 4.1 ASSESSING DATA PROTECTION RISKS & REQUIREMENTS

## Note 1: What does 'Minor' and 'Vulnerable Individual' mean?

A **minor** is defined as an individual below 18 years of age. Where the processing relates to 'electronic marketing' the age limit is reduced to 16 years. A **vulnerable individual** may be anyone who is unable to consent to, or oppose, the processing of his or her personal data for any reason. Both of these are of particular importance if the project compels the provision of data from individuals.

## Note 2: What does 'large scale processing' mean?

The GDPR does not define what constitutes large-scale. EU guidance recommends that the following factors, in particular, be considered when determining whether the processing is carried out on a large scale: ● the number of data subjects (either as a specific number or proportion of the relevant population); ● the volume of data and/or the range of different data items being processed;

- the duration, or permanence, of the data processing activity; &
- the geographical extent of the processing activity.

Examples of large-scale processing include, but are not limited to:

- processing of patient data in the regular course of business by a hospital;
- processing of travel data of individuals using a public transport system (e.g. tracking via travel cards); processing of real time geo-location data of customers of an international fast food chain for statistical purposes by a processor specialised in these activities;
- processing of customer data in the regular course of business by an insurance company or a bank;
- processing of personal data for behavioural advertising by a search engine; &
- processing of data (content, traffic, location) by telephone or internet service providers.

Examples that do  ${f not}$  constitute large-scale processing include, but are not limited

• processing of personal data relating to criminal convictions and offences by an individual lawyer.

A. Applicant Data Protection Assessment Questionnaire – Part I			
1	Does your project include living human subjects?	YES or NO	YE S
2	Does your project include the use of any information (i.e. 'Personal Data') relating to an identified, or identifiable, person?	YES or NO	YE S

Version modified from DCU REC for use by School of Computing, September 2020 Page 8

3	Does your project include the use of identifiers such as: a name, an identification number, location data, an online identifier, or other similar identifiers?	YES or NO	YE S	
4	Does your project include the use of Personal Data specific to the physical, physiological, genetic, mental, economic, cultural or social identity of any living individual?	YES or NO	NO	

If you answered 'Yes' to one or more of Questions 1-4 above, please continue to Part II below (otherwise proceed to the next section of this form). You should also consult with your Supervisor / Principal Investigator to ensure adequate Data Protection compliance measures are in place.

	B. Applicant Data Protection Assessment Questionnaire – Part	II	
5(a)	Does your project include the use of Personal Data of individuals which reveals any of the attributes or characteristics below?	YES or NO	NO
	If 'Yes,' please indicate which will be used in your project (tick all that apply):		
	racial or ethnic origin	YES or NO	NO
	political opinions	YES or NO	NO
	religious or philosophical beliefs	YES or NO	NO
	trade union membership	YES or NO	NO
	genetic data	YES or NO	NO
	biometric data	YES or NO	NO
	data concerning health	YES or NO	NO
	data concerning a natural person's sex life or sexual orientation  Does your project include the use of Personal Data relating to minors	YES or NO	NO
5(b)	or vulnerable individuals? (See <b>Note 1</b> , below)	YES or NO	NO
6	Does your project include the use of Personal Data of individuals relating to their criminal convictions and/or offences?	YES or NO	NO

7	Does your project include large-scale processing of personal data relating to living individuals?  This may include: a wide range or large volume of personal data; processing which takes place over a large geographical area; or where a large number of people are affected (e.g. over 100 individuals); or where the processing is extensive or has long-lasting effects. (See Note 2, below)	YES or NO	NO
8	Does your project include any form of automated processing of personal data, used to evaluate certain personal aspects relating to a living individual?  In particular, to analyse or predict aspects concerning that person's performance at work, economic situation, health, personal preferences, interests, reliability, behaviour, location or movements	YES or NO	NO
9	Does your project include any partners which are third parties outside of DCU?  e.g. Research partners, third party software providers or other providers such as translation or transcription services, etc.	YES or NO	YE S

10 (a)	Does your project involve the sharing or processing of Personal Data outside the EU or the EEA?	YES or NO	NO
	i.e. the EEA is the European Economic Area (the EU plus Norway, Liechtenstein and Iceland)		
10 (b)	If 'Yes', please state which non-EU or EEA country is involved:		
11	Does the project require the matching or combining of separate datasets of information on individuals in a way that would exceed their reasonable expectations of privacy?	YES or NO	NO
	An example would be combining mobile phone location data along with any other dataset to identify individuals.		

If you answered 'Yes' to one or more of these questions, you will need to complete a separate DCU DPIA Screening Questionnaire available from the <u>Data Protection Unit's website</u> to assess whether additional data privacy risk mitigation safeguards are required. **The DPIA should be sent to the DPU not DCU REC.** 

## 4.2 WILL ANONYMISATION OR PSEUDONYMISATION OF THE PERSONAL DATA, WHERE APPLICABLE, BE UNDERTAKEN?

Anonymisation is the process of removing personal identifiers, both direct and indirect, that may lead to an individual being identified. Pseudonymisation is the processing of personal data in such a manner that the personal data can no longer be attributed to a specific living individual without the use of additional information, provided that such additional information is kept separately and is subject to technical and organisational measures to ensure its security.

## If YES, please explain below the methods by which you intend to anonymise/pseudonymise the personal data:

Random ID's with no correlation or connection will be given to any uploaded data and will not be able to be linked back to any form of data analysed.

## 5. DATA/SAMPLE STORAGE, SECURITY AND DISPOSAL

For the purpose of this section the term 'Data' includes personal data that is in a raw or a processed state (e.g. interview audiotape, transcript or analysis, etc.). The term 'Samples' include body fluids and/or tissue samples.

### 5.1 HOW AND WHERE WILL THE DATA/SAMPLES BE STORED?

DCU recommends that any data stored electronically offsite should utilise the DCU Google Drive. Alternative offsite storage will need to be justified and must meet data protection and GDPR compliance requirements.

Data from the processed facial analysis will be stored within a AWS dynamoDB database. All data will be given a random ID so all data is anonymous.

The survey will be created on Google Forms so all information will be stored there. The survey is completely anonymous so no personal data will be stored.

### 5.2 WHO WILL HAVE ACCESS TO DATA/SAMPLES?

If people other than the main researchers have access, please name who they are and explain for what purpose.

The main researchers will have access to the data. A participant can request to view the results should they wish.

### 5.3 HOW LONG IS THE DATA TO BE HELD OR RETAINED?

Version modified from DCU REC for use by School of Computing, September 2020 Page 10

Note that, with very few exceptions, **Personal Data** may not be retained indefinitely. It is up to the project team to establish an upper retention limit for each category of Personal Data used within the project and to ensure it is applied at the expiry of that limit. The School of Computing Research Ethics Committee recommends that Personal Data is retained until after the resit Pab for the current academic year.

The data will be retained until the project has been fully graded. It will then be discarded.

		 	THEN WILL THIS BE ULTS OF THE PROJ	
YES or NO				
NO				
	-			

5.5 IF THE DATA/SAMPLES ARE TO BE DISPOSED OF AT THE END OF THE PROJECT PLEASE EXPLAIN HOW, WHEN AND BY WHOM THIS WILL BE DONE?

Note that simply deleting files is not sufficiently secure. The additional steps to be taken to maintain data security should be given. **Personal data** must be disposed of in a safe and secure manner at the end of its retention period. If the data is stored in (a) a paper-based format, then shredding or disposal via a secure bin is recommended; or (b) in an electronic-based format, then deletion of the record or the full anonymization of the data is recommended. If data/samples are **not** being disposed of, please justify that intention.

How will the data/samples be disposed of?  Please describe the means by which the personal data will be deleted or destroyed. This includes personal data held in hard copy and digital formats.	Databases with all data will be hard deleted off the AWS servers as well as any local files. The database will shut down and completely deleted. All google forms results will also be deleted and completely discarded.
By whom will the data/samples be disposed?  Please indicate the	The data will be deleted by the main researchers, Luke and Karl.
designated team member(s) with responsibility for deletion and/or destruction of the research project's personal data.	

## **6. PLAIN LANGUAGE STATEMENT** (Attach to this document. Up to a max of 400 words)

A Plain Language Statement (PLS) should be used in all cases. This is written information in plain language that you will be providing to participants, outlining the nature of their involvement in the project and inviting their participation. The PLS should specifically describe what will be expected of participants, the risks and inconveniences for them, and other information relevant to their involvement. Please note that the language used must reflect the participant age group and corresponding comprehension level— if your participants have different comprehension levels (e.g. both adults and children) then separate forms should be prepared for each group. The PLS can be embedded in an email to which an online survey is attached, or handed/sent to individuals in advance of their consent being sought. See link to sample templates on the website: https://www.dcu.ie/researchsupport/ethicsapproval.shtml

## PLEASE CONFIRM WHETHER THE FOLLOWING ISSUES HAVE BEEN ADDRESSED IN YOUR PLAIN LANGUAGE STATEMENT/ INFORMATION SHEET FOR PARTICIPANTS:

Note that this list is a check-list of all of the things that you should include in your plain language statement, if they are relevant (they are in most cases). In the earlier sections of this form you have already written the text that can be used to create your plain language statement. References to the relevant sections are provided on each line.

	YES or NO
Introductory Statement (Student(s) and supervisor names, school, title of the project) [Table, p 1]	YES
What is this project about? [section 2.1]	YES
Why is this project being conducted? [section 2.1]	YES
What will the participant be expected to do/have to do if they decide to participate in the study?[section 2.1]	YES
How will their privacy be protected? [section 2.5, section 2.6]	YES
How will the data be used and subsequently disposed of? [section 5.3]	YES
What are the legal limitations to data confidentiality? [section 2.7]	YES
Are there any benefits of taking part in the study? [section 3.3]	YES
Are there any risks of taking part in the study? [section 3.2]	YES
Confirmation that participants can change their mind at any stage and withdraw from the study [see plain language statement template, appendix 1]	YES

Contact details for further information [see plain language statement template, appendix 1]  YES  YES  If any of these issues are marked NO, please justify their exclusion:  FORMED CONSENT FORM (Attach to this document. ## 9. SUBMISSION CHECKLIST (Attach to this document)

Please confirm that all supplementary information is included in your application (in electronic copy). If questionnaire or interview questions are submitted in draft form, please indicate this by putting (draft) after YES. A copy of the final documentation must be submitted for final approval when available.

My application has been collated as one electronic PDF file which includes the following documentation:	INCLUDED (mark as YES)	NOT APPLICABLE (mark as N/A)
Recruitment advertisement [consistent with section 2.3]		N/A
Plain language statement/Information Statement [see section 6 and appendix 1]	YES	
Informed Consent form [see appendices 2 and 3]	YES	

Informed Assent form (children only)		N/A
Evidence of external approvals related to the research [see sections 1.1 and 2.10]		N/A
Questionnaire/Survey	YES	
Interview/Focus Group Questions		N/A

## Appendix 1 DUBLIN CITY UNIVERSITY

## **Plain Language Statement**

The title of our project/research group is INTENDI. The university department involved is DCU School of Computing. The principal project coordinators/investigators are Karl Duignan - <a href="karl.duignan2@mail.dcu.ie">karl.duignan2@mail.dcu.ie</a> and Luke Hebblethwaite - luke.<a href="hebblethwaite2@mail.dcu.ie">hebblethwaite2@mail.dcu.ie</a>. Our project supervisor is Michael Scriney - <a href="michael.scriney@dcu.ie">michael.scriney@dcu.ie</a>. We believe we have both the knowledge and experience as well as the support needed to deal with this project professionally and in a correct manner and also deal with unexpected outcomes.

## Introduction to the Study

We are two computer applications students studying in our final year of our degree. We are developing a web application which will be able to provide valuable feedback and information to lecturers and the university so they can improve their online lectures and videos. The service is completely free to use. Students can voluntarily access their website and sign up. They will then have access to lecturers different lecture videos. They will then be able to provide permission if they want to allow our system to use their webcam to record them while they watch the lecture video. This is used to gather data on how people are responding to the lecture. All their videos will be deleted after analysis and also all data stored will be anonymous. The research is being conducted to test the app and receive feedback from potential users.

## Data Protection/Privacy Notice (Personal Data – GDPR Compliance)

- The identity of the Data Controller/Joint Data Controller and Data Processor Karl Duignan karl.duignan2@mail.dcu.ie and Luke Hebblethwaite luke.hebblethwaite2@mail.dcu.ie DCU Data Protection Officer − Mr. Martin Ward (data.protection@dcu.ie Ph: 7005118 / 7008257) The purpose of the data processing carry out user testing and receive relevant feedback needed.
- The reason(s) for which the data will be processed or held To help improve our project and analyse where advice for improvements is given.
- The categories or types of personal data to be processed facial images
- The details of any third parties (i.e. data processors) with whom the data will be shared or transferred, and the reasons for sharing **NA**
- The details of any external (i.e. non-DCU) parties with whom the data will be shared or transferred, and the reasons for sharing **NA**
- Where relevant, details of any intention to transfer the data to other countries, especially if outside of the EEA (European Economic Area), and the basis for such transfers **NA**
- The retention period, or the criteria used to determine retention periods The data samples will be stored in an electronic based format on Google Forms and on a AWS database. All electronic data records/databases will be erased from all locations including our primary storage and backup storage. The deletion date will be 1st July 2021 after the appeals have taken place.
- The right of the individual to lodge a complaint with the <u>Irish Data Protection Commission</u> Information on the rights of the data subject The data subject has the right to the following; data portability(transfer personal data between electronic processing systems), access(know about what data has been collected from them and how it will be processed), correction(have the right to make changes to data submitted), erasure(ability to withdraw consent and have personal data deleted), consent(must be informed and consent to any changes in how data will be processed/who it will be shared with). They can contact either researcher by email. Karl Duignan <u>karl.duignan2@mail.dcu.ie</u> and Luke Hebblethwaite -

luke.hebblethwaite2@mail.dcu.ie

- Information on their rights to withdraw consent Outlined in the data subject's rights above, they
  have the right to erasure which means the right to withdraw consent and have their personal
  data deleted.
- If it is intended that the data be used for future studies, you must specify the general parameters of the future further project uses to which the participant's project data may be put. NA In cases where personal data will later be anonymized (e.g. for statistical or aggregated data), it is best practice to describe this, so that the participant is fully informed NA

## Advice as to whether or not data is to be destroyed after a minimum period

All data will be completely destroyed at the end of the project. This refers to all database information in regards to facial analysis. All application login details and also all forms filled in on google docs. These will be deleted correctly and in their entirety.

## Details of what participant involvement in the Study will require

Participants will be required to complete user testing, this will involve using the app along with all of it's features which include video recording through their webcam and providing feedback in the form of a survey.

## Potential risks to participants from involvement in the Study (if greater than that encountered in everyday life)

There are no potential risks relating to the involvement in the Research Study that are greater than that encountered in everyday life

Any benefits (direct or indirect) to participants from involvement in the Study By being involved in the user testing of our app this will ensure that the users requirements are met. By providing us with feedback this will enhance the usability of the app for the user and perhaps improve future at home learning with improved lecture videos.

## Advice as to arrangements to be made to protect confidentiality of data, including that confidentiality of information provided is subject to legal limitations

Confidentiality of information can only be protected within the limitations of the law - i.e., it is possible for data to be subject to subpoena, freedom of information claim or mandated reporting by some professions.

## Statement that involvement in the Study is voluntary

Participants may withdraw from the research study at any point and can withdraw their consent if they wish and their personal data will then be deleted.

If participants have concerns about this study and wish to contact an independent person, please contact:

Karl Duignan - <u>karl.duignan2@mail.dcu.ie</u>
Luke Hebblethwaite - luke.hebblethwaite2@mail.dcu.ie

## Any of the principal investigators:

The Secretary, Dublin City University Research Ethics Committee, c/o Research and Innovation Support, Dublin City University, Dublin 9. Tel 01-7008000, e-mail rec@dcu.ie

## Appendix 2 DUBLIN CITY UNIVERSITY

## **Informed Consent Form**

## **Study Title**

The title of our research study is Intendi. The university department involved is DCU School of Computing. The principal investigators are Karl Duignan - karl.duignan2@mail.dcu.ie and Luke Hebblethwaite - luke.hebblethwaite2@mail.dcu.ie.

## Clarification of the purpose of the study

I understand that the purpose of the research is to achieve user testing of the application Intendi and that I will be required to use the application and test all of it's features. I acknowledge the identity of the data controller and the purposes of the processing for which the personal data is intended.

## Confirmation of particular requirements as highlighted in the Plain Language Statement

Participant – please complete the following (Circle Yes or No for each question)

I have read the Plain Language Statement (or had it read to me) Yes/No I understand the information provided Yes/No I understand the information provided in relation to data protection Yes/No I have had an opportunity to ask questions and discuss this study Yes/No I have received satisfactory answers to all my questions Yes/No I am aware that I will be required to fill out a questionnaire Yes/No

## Confirmation that involvement in the Study is voluntary

I understand that I may withdraw from the Research Study at any point.

## Confirmation of arrangements to be made to protect confidentiality of data, including that confidentiality of information provided is subject to legal limitations

I am aware that the confidentiality of data will be treated with the utmost of importance. However, I understand that the confidentiality of information provided is subject to legal limitations.

## Confirmation of arrangements regarding retention/disposal of data

I understand that any personal data will be disposed of once the research has been completed.

## Signature:

I have read and understood the information in this form. My questions and concerns have been answered by the researchers, and I have a copy of this consent form. Therefore, I consent to take part in this project

Participants Signature:		
Name in Block Capitals:		
Witness:		
Date:		

## Appendix 3 Anonymous Online Consent Form

In cases where an anonymous questionnaire is being used, researchers are required to provide a separate tick box for each statement that the participant is being asked to consent to/acknowledge. Each statement must be included as an essential field in order to ensure that full informed consent has been obtained. (see example below).

An Informed Consent Form should generally contain the information detailed below. It should be written in the first person, e.g. "I will be asked to attend...I may withdraw from the study at any point.....I am aware that the data...etc." The headings are there for guidance and do not need to be included in your form.

## **Study Title**

The title of our research study is Intendi. The university department involved is DCU School of Computing. The principal investigators are Karl Duignan - karl.duignan2@mail.dcu.ie and Luke Hebblethwaite - luke.hebblethwaite2@mail.dcu.ie.

## Clarification of the purpose of the study

I understand that the purpose of the research is to achieve user testing of the application Intendi and that I will be required to use the application and test all of it's features. I acknowledge the identity of the data controller and the purposes of the processing for which the personal data is intended.

Confirmation of particular requirements as highlighted in the Plain Language Statement Getting the participant to acknowledge requirements is mandatory, Participants should not be able to access the survey until they have agreed to all items and indicated their consent.

## **Example:**

Participant - please complete the following (by clicking Yes/No for each question)

I have read the Plain Language Statement (or had it read to me) *	I understand I may withdraw from the Research Study at any point *
No I understand the information provided *	No  No  I have read and understand the arrangements to be made to protect confidentiality of data, including that confidentiality of information provided is subject to legal limitations *
O Yes	○ Yes ○ No
No     No     No     No     No     No     No     No	I have read and understand confirmations relating to any other relevant information as indicated in the PLS *  Ves  No
I understand the information provided in relation to data protection *  Yes  No	I consent to participate in this research study *  Yes  No
I have received satisfactory answers to all my questions *  Yes  No
